

Comprehensive Ophthalmology Faculty Practice now accepts CampusCare Vision Plan for *annual eye exams*.

Campus Care has always covered your ophthalmology medical care with a referral from your primary physician. Now, you can get your routine, annual eye exam in the premier Comprehensive Ophthalmology Faculty Practice without a referral using **CampusCare Vision Plan**.

CampusCare Vision Plan appointments are currently available Wednesday afternoons and Thursday mornings.

To make an appointment:

Call 312-355-2915

Tell the scheduler that you are making an appointment for your annual eye exam, covered by the CampusCare Vision Plan. You will not need a referral from your primary physician for your annual eye exam, as a member of CampusCare Vision Plan.

Prescription for Eye Glasses

You will receive a prescription for eye glasses, if needed, at the end of your comprehensive exam.

Prescription for Contact Lenses

Contact lenses require an evaluation in addition to the routine eye exam. The cost of a contact lens evaluation is not covered by CampusCare Vision Plan and ranges from \$50 to \$150 depending on the type of contact lenses needed or preferred, and whether you are being evaluated for contact lenses for the first time or having your current lenses assessed.

If you are interested in contact lenses, please let the scheduler know.

The Comprehensive Ophthalmology Faculty Practice does not sell eye glasses or contact lenses. You may take your prescription to a merchant of your choice.

Comprehensive: **Convenient *and* Covered.**
